Gary:

This is an estimated amount using the measurements of the amount of liquid in the containment and depth from Adam's sample.

So we roughly have about 3316 gallons of oily material in the STF Containment?

Gary:

The calculation of the total waste was 9,948 gallons of the oil/water mixture. We had some additional rain over the weekend. The thick oily layer in the sample Adam collected was about one third.

Leroy:

What was the calculation for the oil volume in the South Tank Farm?

Thanks
